How to Structure a Latex Document

In this article, I shall discuss some of the fundamental topics in producing a structured document. This document itself does not go into much depth, but is instead the output of an example of how to implement structure. Its Latex source, when in used with my tutorial provides all the relevant information.

Introduction

This small document is designed to illustrate how easy it is to create a well structured document within \LaTeX\cite{lamport94}. You should quickly be able to see how the article looks very professional, despite the content being far from academic. Titles, section headings, justified text, text formatting etc., is all there, and you would be surprised when you see just how little markup was required to get this output.

Top Matter

The first thing you normally have is a title of the document, as well as information about the author and date of publication. In \LaTeX{} terms, this is all generally referred to as \emph{top matter}.

Sectioning Commands

The commands for inserting sections are fairly intuitive. Of course, certain commands are appropriate to different document classes. For example, a book has chapters but a article doesn't.

- \texttt{\textbackslash title\{\emph{title}\}} - The title of the article.
- \texttt{\textbackslash date} - The date. Use:
- \texttt{\textbackslash date\{\textbackslash today\}} - to get the
- \texttt{\textbackslash date\{\emph{date}\}} - for a %\emph{} emphasises the specified text. Italics by default.
- \texttt{\textbackslash date\{\}} - for no date.
- \texttt{\textbackslash author} - The author of the document.
- \texttt{\textbackslash address} - The author's address. Use
- \texttt{\textbackslash thanks} - Where you put any acknowledgments.
- \texttt{\textbackslash email} - The author's email address.
- \texttt{\textbackslash urladdr} - The URL for the author's web page.

Command	Level
\part{part}	-1
\chapter{chapter}	0
\section{section}	1
\subsection{subsection}	2
\subsubsection{subsubsection}	3
\paragraph{paragraph}	4
\subparagraph{subparagraph}	5

top matter title date part chapter section subsection subsubsection paragraph subparagraph \LaTeX: A Document Preparation System
